(54) Title: VAPORIZATION WATER DISTRIBUTION PLANT

(57) Abstract: A vaporization water distribution plant consisting of at least one feeding collector (13) with nozzle-holder ramps (15) equipped with a series of nozzles (14), in which there are tighteners (18, 24) both for the assembly and blockage of the nozzle-holder ramps (15) with respect to at least one collector (13) and also of the nozzles (14) to the nozzle-holder ramps (15), both blockages being effected with the interposition of washers (22, 27). The dimension and configuration of the vaporization water distribution plant is such as to be able to tolerate the operating conditions established by use in vaporization chambers and by the functioning characteristics of feeding pumps (11), installed upstream of the present plant.
